

COVID-19 IN FULTON COUNTY - UPDATE AS OF 07/06/23

Total Confirmed Cases	New Confirmed Cases	Total Hospitalizations	New Hospitalizations	Total Confirmed Deaths	New Confirmed Deaths
238,792	399	12,460	<10	2,418	<10

New refers to the **most recent 4 weeks** after a one-week delay to account for a lag in test result reporting – **6/2/23 – 6/29/23**

Total refers to cumulative amount **since March 2020**

Counts shown reflect the number of confirmed cases using the date of most recent positive sample collection. The Georgia Department of Public Health defines a confirmed cases as someone with a positive molecular test, also known as PCR. A probable case is defined as a positive antigen test, though probable cases are still considered positive cases and individuals who tested positive through an antigen test should follow all DPH isolation and quarantine guidance. **Note:** Delays in data reporting may cause changes in data counts, particularly in the shaded portion. Data throughout this report are preliminary and subject to ongoing data cleaning processes, and thus are subject to change.

In the recent two-week reporting period (6/16 - 6/29), there were **more new cases of COVID-19** in Fulton County than the previous two weeks (6/2 - 6/15).

COVID-19 YEARLY TRENDS COMPARISON

COVID-19 CASES BY VACCINATION STATUS²

²Cumulative for this figure refers to all confirmed cases beginning July 1, 2021, as this is around the time boosters were made widely available to the public.
