

## SUMMARY

- As of August 14, 2020, Fulton County has recorded **21,570** cases of the 2019 novel coronavirus (COVID-19) and **463** deaths.
- Of 2,603 **new diagnoses** made between July 25 and August 7, the central portion of the county (Atlanta metro) accounted for 37% while the northern and southern parts accounted for 29% and 21% respectively.
- By city, **new** COVID-19 diagnoses rates range from 143.5 per 100,000 persons (Johns Creek) to 334.0 per 100,000 persons (Union City). [Fulton County Diagnoses Rates (per 100,000 persons): Cumulative – 2074.4; Incident –244.7]. See map showing incident case rate by ZIP code on Pg.4.
- Among all persons diagnosed with COVID-19 in Fulton County, 9.2% required hospitalization and 2.1% died.
- Residents and staff of long-term care facilities account for 8.0% of COVID-19 diagnoses and 46.0% of COVID-19 deaths in Fulton County.

<sup>1</sup>**New cases:** Cases diagnosed in most recent 28 days (based on reported dates of positive sample collection). To allow for lag in reporting results of new diagnoses from samples collected in the most recent week, data used for incident diagnoses analyses were moved back by one week. <sup>2</sup>**Cumulative diagnosis rate:** Population estimates from US Census Bureau used to calculate cumulative diagnoses rate. All rates shown are per 100,000 persons. <sup>3</sup>**% change:** These reflect the percentage increase or decrease in new diagnoses between the 14 days preceding the most recent 7 days and the 14 days preceding that. Changes in cities with less than 10 cases in both 2 week intervals are not reported. <sup>4</sup>**(Incidence) Rate:** Rate of new diagnoses in the last 14 day period preceding the immediate past week. \*\*Data cleaning (either during case interviews or address geo-coding) may lead to reassignment of few cases from one territory to another based on their corrected addresses. These may appear as “decreases” when compared to the previous day’s count. These do not reflect errors in the data collection or analysis process but only reflect the minor day-to-day fluctuations in case counts that arise in an evolving public health database like COVID’s. **Note: All data reported are preliminary and subject to change.**

\*Rates shown are per 100,000 persons | **Note:** Mass testing in specific locations (e.g. long term care facilities) may cause sharp increases in the cumulative rate of COVID-19 diagnosis in those territories. All data shown are preliminary and are subject to change as testing results get updated.

## COVID-19 IN LONG-TERM CARE FACILITIES IN FULTON COUNTY

Older persons (aged 65 years and older) and persons who live in nursing homes or other long-term care facilities seem to be at higher risk for developing more serious complications from COVID-19. Extra precautions are recommended for individuals within this risk groups – Centers for Disease Control and Prevention (CDC 2020) <https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-at-higher-risk.html>
