

COVID-19 IN FULTON COUNTY - UPDATE AS OF 01/18/23

Total Confirmed Cases	New Confirmed Cases	Total Hospitalizations	New Hospitalizations	Total Confirmed Deaths	New Confirmed Deaths
234,035	4,381	12,005	72	2,347	8

New refers to the most recent 4 weeks after a one-week delay to account for a lag in test result reporting – 12/15/22 – 1/11/23

Counts shown reflect the number of confirmed cases using the date of most recent positive sample collection. The Georgia Department of Public Health defines a confirmed cases as someone with a positive molecular test, also known as PCR. A probable case is defined as a positive antigen test, though probable cases are still considered positive cases and individuals who tested positive through an antigen test should follow all DPH isolation and quarantine guidance. **Note:** Delays in data reporting may cause changes in data counts, particularly in the shaded portion. Data throughout this report are preliminary and subject to ongoing data cleaning processes, and thus are subject to change.

In the recent two-week reporting period (12/29 - 1/11), there were **fewer new cases of COVID-19** in Fulton County than the previous two weeks (12/15 - 12/28).

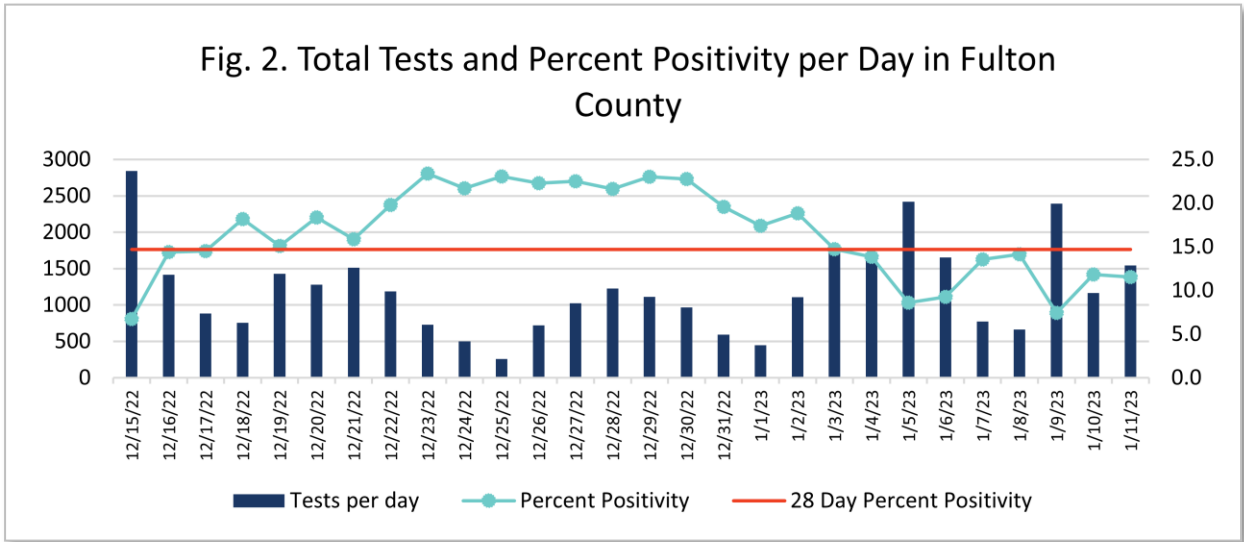

The **CDC Community Level** for Covid-19 in Fulton County is currently

 **Medium**

TESTING UPDATE¹

Fulton Percent Positivity 12/15/22 – 1/11/23	Georgia Percent Positivity 12/15/22 – 1/11/2023
14.7%	17.5%

¹PCR tests only.
