

SUMMARY

- As of June 12, 2020, Fulton has recorded **5,073** cases of the 2019 novel coronavirus (COVID-19) and **276** deaths.
- The central portion of the county (Atlanta metro) accounts for 46% of the cumulative case count while the northern and southern parts of the county together account for 44% of the COVID-19 cumulative case count in the county.
- By city, cumulative COVID-19 diagnoses rates range from 159.0 per 100,000 persons (Johns Creek) to 906.3 per 100,000 persons (Union City).
- Among all persons diagnosed with COVID-19 in Fulton County, 18.7% required hospitalization and 5.4% died.
- Residents and staff of long-term care facilities account for 24% of COVID-19 diagnoses and 54% of COVID-19 deaths in Fulton County (6/10/20).

Daily and Cumulative COVID-19 diagnoses in Fulton County, GA (6/12/20)

*Counts shown reflect the number of confirmed cases as of 9:00am on 6/12/20 using the date of first positive sample collection. Where date of sample collection was not available or missing, the date of report creation in GA SENDSS was used instead. **Note:** All data reported are preliminary and subject to change. Delays in data reporting may cause changes in data counts, particularly in the shaded portion.

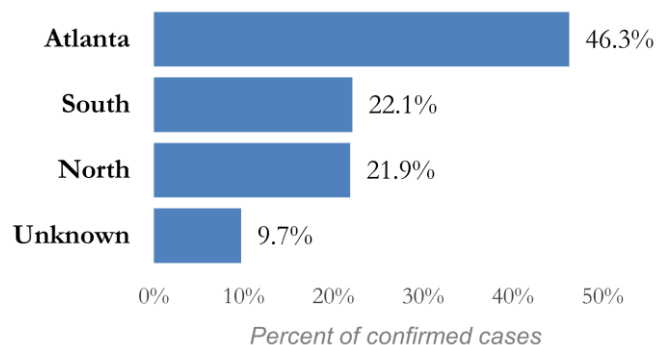

DISTRIBUTION OF COVID-19 DIAGNOSES BY REGION

New cases: 49% of the new COVID-19 cases diagnosed in the past 2 weeks occurred in Atlanta while 24% and 18% occurred in the Northern and Southern regions of the county respectively.

Fulton Region	% Cumulative count	% New cases*
Atlanta	46.3%	49.0%
North ¹	21.9%	24.1%
South ²	22.1%	18.1%
Unincorporated/Unknown	9.7%	8.8%

¹Includes all Fulton County cities north of Atlanta metro (Alpharetta, Milton, Johns Creek, Roswell, Sandy Springs, Mountain Park) | ²Includes all cities south of Atlanta (College Park, Chattahoochee Hills, East Point, Hapeville, Palmetto, South Fulton, Fairburn, and Union City) ***New cases:** Cases diagnosed in the past 2 weeks only (using the date of sample collection).

Distribution of COVID 19 cases by Region (6/12/20)

¹**New cases:** Cases diagnosed in most recent 28 days (based on reported dates of positive sample collection). To allow for lag in reporting results of new diagnoses from samples collected in the most recent week, data used for incident diagnoses analyses were moved back by one week. ²**Cumulative diagnosis rate:** Population estimates from US Census Bureau used to calculate cumulative diagnoses rate. All rates shown are per 100,000 persons. ³**Percent change:** These reflect the percentage increase or decrease in new diagnoses between the 14 days preceding the most recent 7 days and the 14 days preceding that. Changes in cities with less than 10 cases in both 2 week intervals are not reported. ⁴**Incidence Rate:** Rate of new diagnoses in the recent past 14 days. **Data cleaning (either during case interviews or address geo-coding) may lead to reassignment of few cases from one territory to another based on their corrected addresses. These may appear as “decreases” when compared to the previous day’s count. These do not reflect errors in the data collection or analysis process but only reflect the minor day-to-day fluctuations in case counts that arise in an evolving public health database like COVID’s. **Note:** Sharp increases in territorial COVID case counts often reflect new cases diagnosed at long term care facilities located in those territories during facility-wide /mass screening events **All data reported are preliminary and subject to change.**

Fig. 3. Incident & Cumulative Diagnoses Rates for COVID-19 by City (6/12/20)

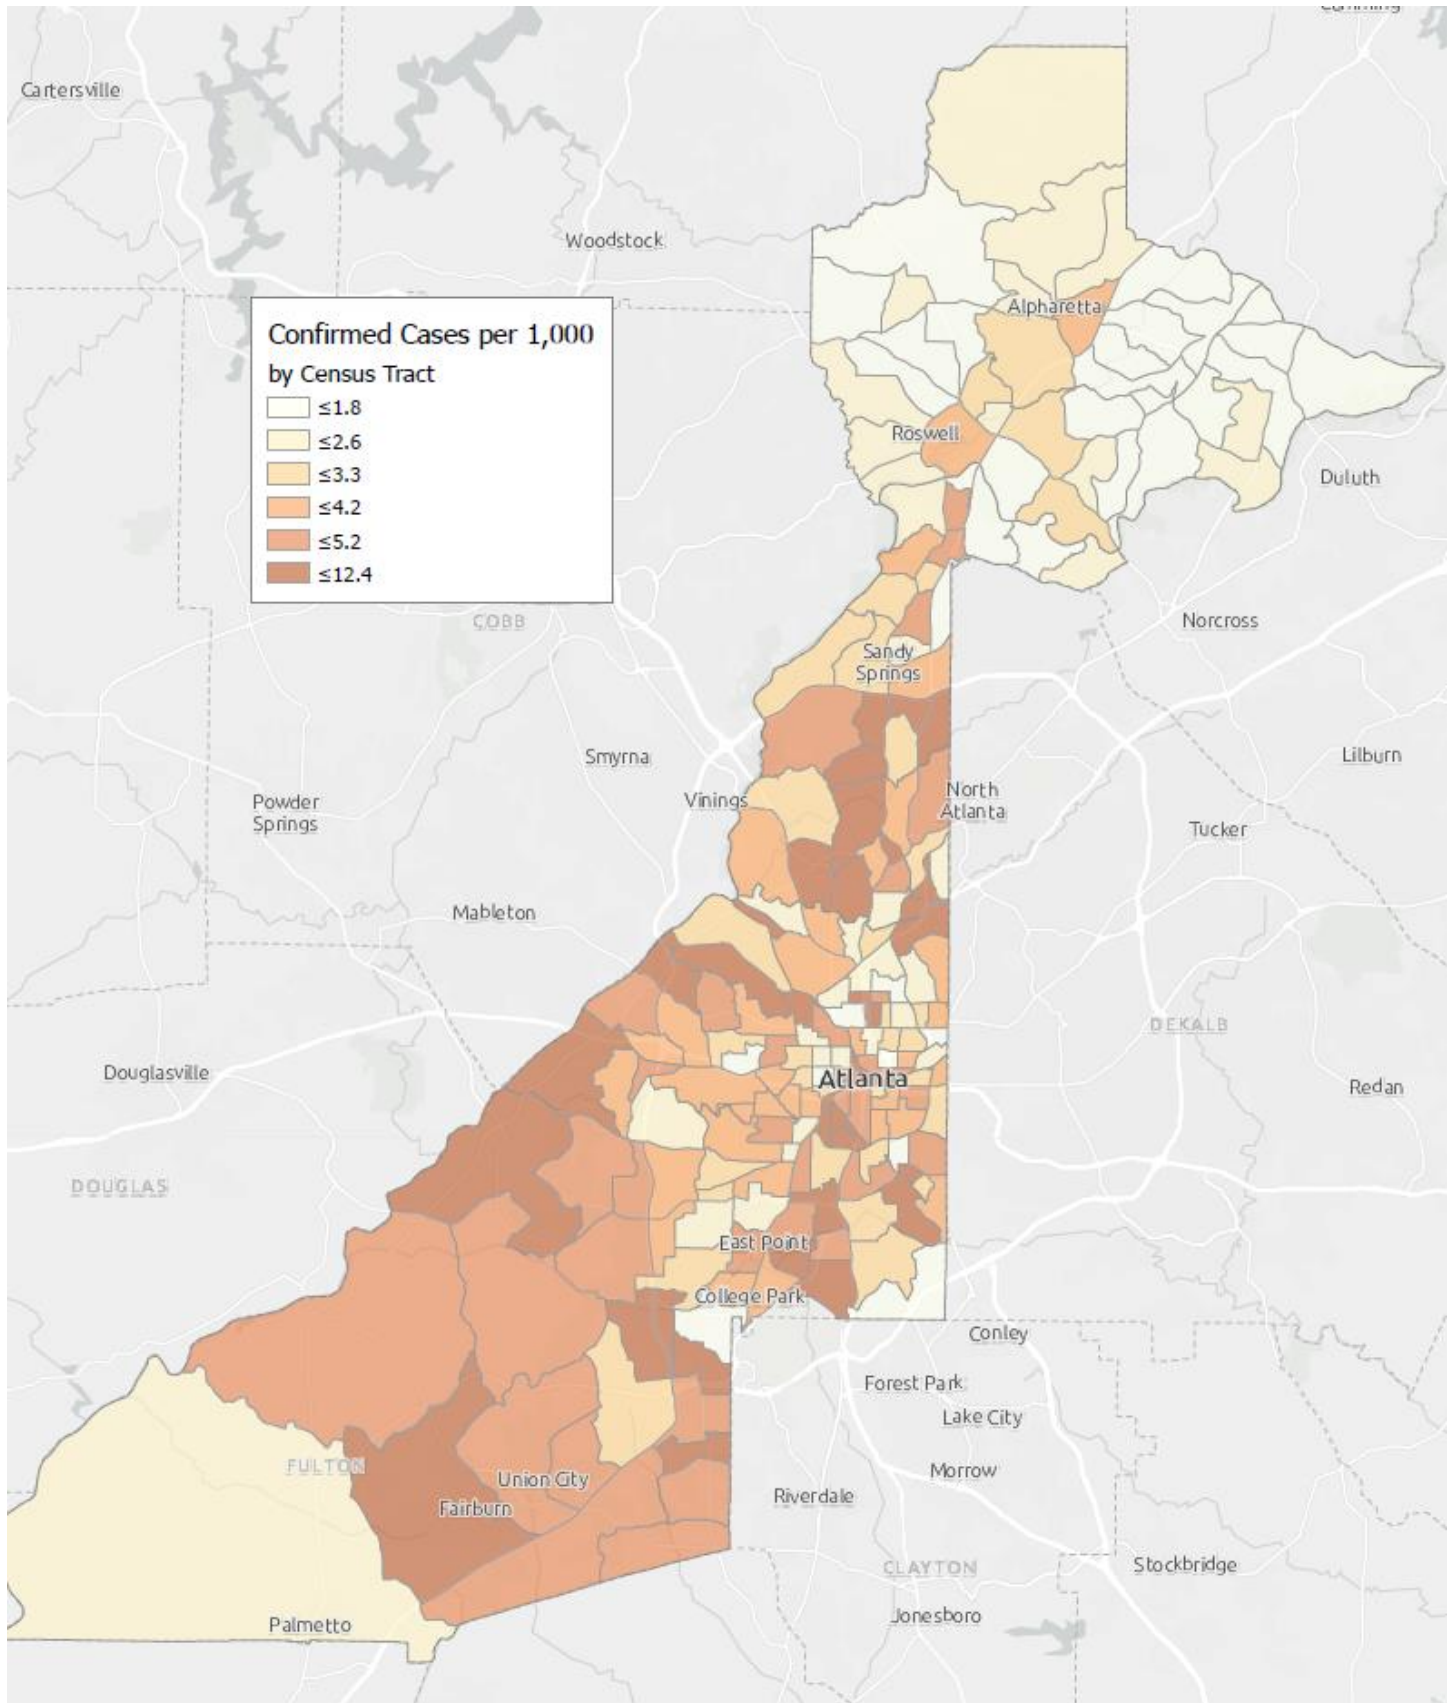

*Rates shown are per 100,000 persons | **Note:** Mass testing in specific locations (e.g. long term care facilities) may cause sharp increases in the cumulative rate of COVID-19 diagnosis in those territories. All data shown are preliminary and are subject to change as testing results get updated.

COVID-19 IN LONG-TERM CARE FACILITIES IN FULTON

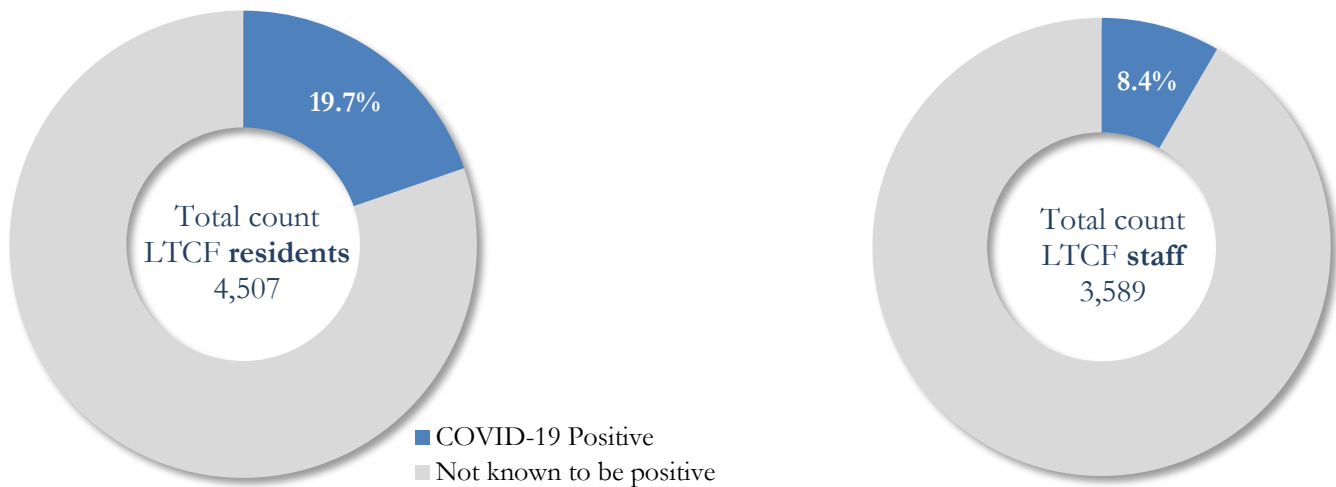

Older persons (aged 65 years and older) and persons who live in nursing homes or other long-term care facilities seem to be at higher risk for developing more serious complications from COVID-19. Extra precautions are recommended for individuals within this risk groups – Centers for Disease Control and Prevention (CDC 2020) <https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-at-higher-risk.html>

COVID-19 Diagnoses and Deaths in Fulton County Associated with Long-Term Care Facilities (6/10/20)

COVID-19 POSITIVITY: COVID-19 testing is currently being provided at various long-term care facilities in Fulton County through the efforts of the Board of Health and the National Guard. See <https://dch.georgia.gov/> for a line listing of COVID-19 cases at all facilities in Georgia.
