

MONKEYPOX IN FULTON COUNTY – UPDATE AS OF 9/15/2022

Georgia	Fulton County
1,614	724

Fulton County accounts for 45% of the state’s cases

Fig. 1. Probable and Confirmed Cases of Monkeypox in Fulton County, GA

Data in this report reflect case counts of probable and confirmed Monkeypox cases in Fulton County residents. Probable cases are defined by the CDC as having no suspicion of other recent Orthopoxvirus exposure AND demonstration of the presence of Orthopoxvirus DNA by polymerase chain reaction of a clinical specimen OR Orthopoxvirus using immunohistochemical or electron microscopy testing methods OR demonstration of detectable levels of anti-orthopoxvirus IgM antibody during the period of 4 to 56 days after rash onset. Confirmed cases are defined by the CDC as having demonstration of the presence of Monkeypox virus DNA by polymerase chain reaction testing or next-Generation sequencing of a clinical specimen OR isolation of Monkeypox virus in culture from a clinical specimen. Date on x-axis refers to date of symptom onset.
