10. NO CONTACT PROVISION

It is the policy of Fulton County that the evaluation and award process for County contracts shall be free from both actual and perceived impropriety, and that contacts between potential vendors and County officials, elected officials and staff regarding pending awards of County contracts shall be prohibited.

- a. No person, firm, or business entity, however situated or composed, obtaining a copy of or responding to this solicitation, shall initiate or continue any verbal or written communication regarding this solicitation with any County officer, elected official, employee, or designated County representative, between the date of the issuance of this solicitation and the date of the County Manager's recommendation to the Board of Commissioners for award of the subject contract, except as may otherwise be specifically authorized and permitted by the terms and conditions of this solicitation.
- b. All verbal and written communications initiated by such person, firm, or entity regarding this solicitation, if same are authorized and permitted by the terms and conditions of this solicitation, shall be directed to the Purchasing Agent.
- c. Any violation of this prohibition of the initiation or continuation of verbal or written communications with County officers, elected officials, employees, or designated County representatives shall result in a written finding by the Purchasing Agent that the submitted Bid or proposal of the person, firm, or entity in violation is "non-responsive", and same shall not be considered for award.

- 11. BID AND CONTRACT SECURITY:** A Bid Bond for an amount equal to five percent (5%) of the bid amount must accompany each Proposal. The bid bond shall be submitted in a separate, sealed envelope marked "Bid Bond".

Bids must be accompanied by a bid bond or certified check in an amount of five percent (5%) of the TOTAL AMOUNT of the base bid. The bid bond or certified check shall apply ONLY TO THIS BID. The bid name and contract number must appear on the security instrument. The bond must remain in full force and effect until the Bidder executes the final Contract. A certified cashier's check will be acceptable. When the bidder's package is opened, a Purchasing Agent will verify the presence of the Bid Bond and remove it from the bid package.

If the bidder withdraws its bid from the competition after the selection of its bid for a reason not authorized by Georgia law, the County will proceed on the Bid Bond, along with any other available remedies.

Any bid bond, performance bond, payment bond, or security deposit required for public works construction contract shall be approved and filed with purchasing agent. At the option of the County, if the surety named in the bond is other than a surety company authorized by law to do business in this state pursuant to a current certificate of authority to transact surety business by the Commissioner of Insurance, such bond shall not be

approved and filed unless such surety is on the United States Department of Treasury's list of approved bond sureties.

A Purchasing Agent shall approve as to form and as to the solvency of the surety any bid bond, performance bond, or payment bond required. In the case of a bid bond, such approval shall be obtained prior to acceptance of the bid or proposal. In the case of payment bonds and performance bonds, such approval shall be obtained prior to the execution of the contract.

Whenever, in the judgment of the County:

- (1) Any surety on a bid, performance, or payment bond has become insolvent;
- (2) Any corporation surety is not longer certified or approved by the Commissioner of Insurance to do business in the state; or
- (3) For any cause there are no longer proper or sufficient sureties on any or all the bonds

The County may require the contractor to strengthen any or all of the bonds or to furnish a new or additional bond or bonds within ten (10) days. Thereupon, if so ordered by the County, all work on the contract shall cease unless such new or additional bond or bonds are furnished. If such bond or bonds are not furnished within such time, the County may terminate the contract and complete the same as the agent of and at the expense of the contractor and his or her sureties.

Attorneys-in-fact for bidders who sign bid bonds or contract bonds must file with each bond a certified and effectively dated copy of their power of attorney.

12. **RIGHT TO REJECT BIDS:** The County reserves the right to reject any or all bids and to waive informalities. No bids will be received after the time set for opening bids. Unbalanced bids will be subject to rejection. Any bidder may withdraw his/her bid, either personally or by telegraphic or written request, at any time prior to the scheduled closing time for receipt of bids. Telegraphic or written requests for withdrawal must be in the possession of the County prior to the closing time for receipt of bids.

At the bid opening each bidder shall be presumed to have read and be familiar with the contract documents.
15. **INSURANCE AND RISK MANAGEMENT PROVISIONS:** Insurance and Risk Management Provisions and Indemnification and Hold Harmless provisions are outlined in Section 6 of this bid document. The bidder is required to sign the document and include it with its bid submission.

17. **BID OPENING:** Bids will be opened in public and read aloud. All bidders are requested to be present at the opening.
18. **DETERMINATION OF SUCCESSFUL BIDDER:** Fulton County desires to complete this work in a timely manner. The Contract will be awarded to the lowest responsive, responsible bidder(s), if awarded.
- 1) **Responsibility:** The determination of the bidder's responsibility will be made by the County based on whether the bidder meets the following minimum requirements:

19. **NOTICE OF AWARD OF CONTRACT:** As soon as possible, and within sixty (60) days after receipt of bids, the County shall notify the successful Bidder of the Award of Contract.

The award shall be made by the Board of Commissioners of Fulton County to the lowest responsive, responsible bidder(s) as soon as possible after receipt of bids, taking into consideration price and the responsiveness to the requirements set forth in the Invitation for Bid. In such case, no claim shall be made by the selected Contractor(s) for loss of profit if the contract is not awarded or awarded for less work than is indicated and for less than the amount of his bid. The total of the awarded contract shall not exceed the available funds allocated for this project.

Should the County require additional time to award the contract, the time may be extended by mutual agreement between the County and the successful bidder. If an Award of Contract has not been made within sixty (60) days from the bid date or within the extension mutually agreed upon, the Bidder may withdraw the Bid without further liability on the part of either party.

Any award made by the Board of Commissioners as a result of this bid will begin from the date of the notice to proceed. The Bidder agrees hereby to commence work under this Contract, with adequate personnel and equipment, on a date to be specified in a written order of the Program Manager. The contract shall become effective on the Contract Date and shall continue in effect until the end of the term of the contract or until the project has been closed-out by the User Department unless earlier terminated pursuant to the termination provisions of the contract.

20. **BASIS OF AWARD:** The Contract, if awarded, will be awarded on a lump sum basis to the lowest responsive and responsible bidder. No bid may be withdrawn for a period of sixty (60) days after the date of bid opening except as permitted by O.C.G.A., §36-91-41 et seq., as amended. Each Bid must be accompanied by a Bid Bond in accordance with the Bid Bond Requirements provided in the Contract Documents, on a Surety Company's Standard Bid Bond Form acceptable to the County in an amount no less than 5% of the amount bid.

The successful bidder will be required to furnish a Performance Bond and Payment Bond, **on or before** the issuance of Notice to Proceed, each in the amount of 100% of the Contract Amount. All other required Contract Documents must be fully completed and executed by the Contractor and his/her Surety, and submitted to the Owner **on or before** the issuance of the Notice to Proceed.

- 21. EXECUTION OF CONTRACT DOCUMENTS:** Upon notification of Award of Contract, the County shall furnish the Contractor the conformed copies of Contract Documents for execution by the Contractor and Contractor's surety.

Within fifteen (15) days after receipt the Contractor shall return all the documents properly executed by the Contractor and the Contractor's surety. Attached to each document shall be an original power-of-attorney for the person executing the bonds for the surety and certificates of insurance for the required insurance coverage.

After receipt of the documents executed by the Contractor and his surety with the power-of-attorney and certificates of insurance, the County shall complete the execution of the documents. Distribution of the completed documents will be made upon completion.

Should the contractor and/or surety fail to execute the documents within the time specified, the County shall have the right to proceed on the Bid Bond accompanying the bid.

If the County fails to execute the documents within the time limit specified, the Contractor shall have the right to withdraw the Contractor's bid without penalty.

Should an extension of any of the time limits stated above be required, this shall be done only by mutual agreement between both parties.

Any agreement or contract resulting from the acceptance of a bid shall be on a County approved document form. The County reserves the right to reject any agreement that does not conform to the Invitation for Bid and any County requirements for agreements and contracts. The County reserves the right to modify the agreement resulting from this bid upon the recommendation of the County Attorney.

- 22. JOINT VENTURE:** Any Bidder intending to respond to this solicitation as a joint venture must submit an executed joint venture agreement with its offer. The agreement must designate those persons or entities authorized to execute documents or otherwise bind the joint venture in all transactions with Fulton County, or accompanied by a document, binding upon the joint venture and its constituent members, making such designation. Offers from joint ventures that do not include these documents will be rejected as being non-responsive.

- 23. CONTRACTORS COMPLIANCE WITH ALL ASSURANCES AND/OR PROMISES MADE IN RESPONSE TO PROCUREMENT:** Should any Bidder submit a response to the County promising to provide a certain level of service for either the scope of work, MFBE participation, or any other matter, including where such promise or assurance is greater than what is required by the procurement documents, and should this response containing the promise or assurance be accepted by the County and made a part of the Contract Documents, then this degree or level of service promised by the bidder relating to the scope of work, MFBE participation, or other matter shall be considered to be a material part of the Agreement between the bidder and the County, such that the bidder's failure to provide the agreed upon degree or level of service or participation shall be a material breach of the Agreement giving the County just cause to terminate the Agreement for cause, pursuant to the General Conditions of the Agreement.

Unless clearly shown as "no substitute" or words to that effect, any items in this invitation to Bid which have been identified, described or referenced by a brand name or trade name are for reference only. Such identification is intended to be descriptive but not restrictive, and is to indicate the general quality and characteristics of products that may be offered. Each item Bid must be individually identified as to whether it is a specified item or an equivalent item by typing or printing after the item(s): The brand name; model or manufacturer's number, or identification regularly used in the trade. Deviations from the specifications must be clearly and fully listed on the Bid sheet, including photographs or cuts, specifications, and dimensions of the proposed "alternate". Fulton County is the sole judge of "exact equivalent", or "alternate". The factors to be considered are: function, design, materials, construction, workmanship, finishes, operating features, overall quality, local service facilities, warranty terms and service, and other relevant features of item(s) Bid.
- P. For all Bids, Fulton County reserves the right to request representative samples. If requested, samples must be delivered at the Bidder's cost within three (3) business days. Samples are submitted at the risk of the Bidder and may be subjected to destructive tests by Fulton County. Samples must be plainly tagged with Fulton County's Bid number, item name, manufacturer, and the name of the Bidder.

- Q. Item(s) Bid must be complete and ready to operate. No obvious omissions of components or necessary parts shall be made even though the specifications may not detail or mention them. Unit(s) must be furnished with factory installed equipment and must be comparable with the basic form, fit, and functional requirements which are all to be included in the base price as well as any other equipment included as standard by the manufacturer or generally provided to the buying public.
- R. All successful Bidders must assume full responsibility for all item(s) damaged prior to F.O.B. Destination delivery and agree to hold harmless Fulton County of all responsibility for prosecuting damage claims.
- S. All successful Bidders must assume full responsibility for replacement of all defective or damaged goods within thirty (30) days of notice by Fulton County of such defect or damage.
- T. All successful Bidders must assume full responsibility for providing or ensuring warranty service on any and all items including goods, materials, or equipment provided to the County with warranty coverage. If a successful Bidder is not the manufacturer, all manufacturers' warranties must be passed through to Fulton County. The Bidder and not Fulton County is responsible for contacting the manufacturer of the warranty service provided during the warranty period and supervising the completion of the warranty service to the satisfaction of Fulton County.
- U. As a successful Bidder providing any equipment which requires fitting and assembly, the Bidder shall be solely responsible for such installation being performed by a manufacturer's authorized or approved servicer or an experienced worker, utilizing workmanship of the highest caliber. The Bidder must verify all dimensions at the site, shall be responsible for their correctness, and shall be responsible for the availability of replacement parts when specified in writing by Fulton County in the specifications, purchase order, or other contract.
- V. A successful Bidder is solely responsible for disposing of all wrappings, crating, and other disposable material upon delivery of item(s).
- W. All Bidders are required to be authorized distributors or regularly engaged in the sale or distribution of the type of goods, materials, equipment or services for which the Bidder is submitting a Bid response in addition, all Bidders are required to provide Fulton County with three (3) written references documenting the successful completion of Bids or contracts for the types of items including goods, materials, equipment, or services for which the Bidder is submitting a Bid response. In instances where a Bidder has never supplied such goods, material, equipment, or services before, the Bidder must submit with the Bid response a statement and supporting documentation demonstrating such expertise, knowledge, or experience to establish the Bidder as a responsible Bidder, capable of meeting the Bid requirements should an award be made. No exceptions to this provision will be made unless authorized in the Bid specifications.

- X. Bidders may be required to furnish evidence that they maintain permanent places of business of a type and nature compatible with their Bid proposal, and are in all respects competent and eligible vendors to fulfill the terms of the specifications. Fulton County may make such investigations as it deems necessary to determine the ability of the Bidder to perform such work, and reserves the right to reject any Bidder if evidence fails to indicate that the Bidder is qualified to carry out the obligation of the Contract and to complete the work satisfactorily.
- Y. All Bidders must comply with all Fulton County Purchasing laws, policies, and procedures, non-discrimination in contracting and procurement ordinances, and relevant state and federal laws including but not limited to compliance with EEOC hiring guidelines and requirements under the Americans with Disabilities Act. Successful Bidder must obtain all permits, licenses, and inspections as required and furnish all labor, materials, insurance, equipment, tools, supervision, and incidentals necessary to accomplish the work in these specifications.
- Z. If a successful Bidder is unable or unwilling to enter into a Contract with Fulton County subsequent to being granted an award, or who fails to perform in accordance with the Bid specifications the Bidder will be subject to damages and all other relief allowed by law.
- AA. Successful Bidders contract directly with Fulton County and are the party or parties obligated to perform. Contracts may not be assigned and any failure to perform the Contract in accordance with the specifications will constitute a breach of Contract and may result in a Bidder being found to be “non-responsive” in the future.
- BB. In case of default by the successful Bidder, Fulton County may procure the articles for services from another source and hold the successful Bidder responsible for any resulting excess cost.
- CC. The County may award any Bid in whole or in part to one or more vendors or reject all Bids and/or waive any technicalities if it is in the best interests of the County to do so. In the event that all Bids are not rejected, Bids for items including goods, materials, equipment, and services will be awarded to the lowest “responsible” Bidder(s) as determined by Fulton County. Submitting the lowest Bid, as published at the Bid opening, does not constitute an award or the mutual expectation of an award of a Contract and purchase order. For purposes of this notice and the attached Bid sheets, a purchase order is a Contract to provide items including goods, materials, equipment, and services and is intended to have the full force and effect of a Contract. A breach of the terms and conditions of a purchase order constitutes a breach of Contract.
- DD. Bids for projects that are solicited pursuant to the Georgia Local Government Public Works Construction Law (O.C.G.A. § 36-91-1 et seq.) may withdrawn as follows:
 - a. Competitive sealed Bids (“Bid”) may not be revoked or withdrawn until 60 days after the time set by the governmental entity for opening of Bids. At the end of this time period, the Bid will cease to be valid, unless the Bidder provides written notice to the County prior to the scheduled expiration date that the Bid will be extended for a time period specified by the County.

- EE. In the evaluation of the Bids, any award will be subject to the Bid being:
- a. Compliant to the specification – meets form, fit, and function requirements stated or implied in the specification.
 - b. Lowest cost to the County over projected useful life.
 - c. Administratively Compliant – Including all required bonds, insurance, established quality of work and general reputation, financial responsibility, relevant experience, and related criteria.
- FF. All proposals and Bids submitted to Fulton County are subject to the Georgia “Open Records Act”, Official Code of Georgia, Annotated (O.C.G.A.) §50-18-70 et seq.
- GG. All proposals and Bids submitted to Fulton County involving Utility Contracting are subject to the Georgia law governing licensing of Utility Contractors, O.C.G.A. §43-14-8.2(h). The Utility Contractor License number of the person who will perform the utility work shall be written on the face of the Bid envelope.
- HH. The apparent silence of this specification, and any supplement thereto, as to details, of the omission from it of a detailed description concerning any point, will be regarded as meaning only the best commercial practices are to prevail. Only materials of the highest quality, correct type, size, and design are to be used. All interpretations of this specification will be made upon the basis of this statement, with Fulton County interpretation to prevail.
- II. It is the policy of Fulton County that the evaluation and award process for County contracts shall be free from both actual and perceived impropriety, and that contacts between potential vendors and County officials, elected officials and staff regarding pending awards of County contracts shall be prohibited.
- a. No person, firm, or business entity, however situated or composed, obtaining a copy of or responding to this solicitation, shall initiate or continue any verbal or written communication regarding this solicitation with any County officer, elected official, employee, or designated County representative, between the date of the issuance of this solicitation and the date of the County Manager’s recommendation to the Board of Commissioners for award of the subject contract, except as may otherwise be specifically authorized and permitted by the terms and conditions of this solicitation.
 - b. All verbal and written communications initiated by such person, firm, or entity regarding this solicitation, if same are authorized and permitted by the terms and conditions of this solicitation, shall be directed to the Purchasing Agent.
 - c. Any violation of this prohibition of the initiation or continuation of verbal or written communications with County officers, elected officials, employees, or designated County representatives shall result in a written finding by the Purchasing Agent that the submitted Bid or proposal of the person, firm, or entity in violation is “non-responsive”, and same shall not be considered for award.

- JJ. Any Bidder intending to respond to this solicitation as a Joint Venture must submit an executed Joint Venture Agreement with this Bid. This agreement must designate those persons or entities authorized to execute documents or otherwise bind the Joint Venture in all transactions with Fulton County, or are accompanied by a document, binding upon the Joint Venture and its constituent members, making such designation. Bids from Joint Ventures that do not include these documents will be rejected as being "non-responsive".
- KK. Any Bidder intending to respond to this solicitation must complete all of the Procurement Affidavit Forms provided in this solicitation. Bids that do not include these completed documents will be rejected as being "non-responsive".

- (2) If the Offeror is unable to certify to any of the statements in this certification, such Offeror or subcontractor shall attach an explanation to this bid or proposal.

INSTRUCTIONS FOR CERTIFICATION

By signing and submitting this certification, the Offeror is providing the certification set out below:

- (1) The certification in this clause is a material representation of fact upon which reliance will be placed. If it is later determined that the prospective vendor knowingly rendered a false certification, the Purchasing Agent may pursue all available remedies, including suspension and/or debarment, for withdrawal of award or termination of a contract.
- (2) The prospective Offeror shall provide immediate written notice to the Purchasing Agent if at anytime the Offeror learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
- (3) Offeror shall be under a continuing duty to immediately inform the Purchasing Agent in writing of any changes, if as a result of such changes, the Offeror certification regarding debarment is affected.

DEBARMENT ORDINANCE

The following Section 2-322 of Fulton County Code of Laws establishes the procedure for the debarment of contractors.

(a) Authority to suspend.

After reasonable notice to the entity involved and reasonable opportunity for that entity to be heard, the Purchasing Agent, after consultation with user department, the County Manager and the County Attorney shall have the authority to suspend an entity for cause from consideration for award of county contracts. As used in this section, the term entity means any business entity, individual, firm, contractor, subcontractor or business corporation, partnership, limited liability corporation, firm, contractor, subcontractor or business structured; provided, further, that any such entity shall also be subject to suspension under this section if any of its constituents, members, subcontractors at any tier of such entity's and the entity, or any constituent or member, knew or should have known of the commission of the act. The suspension shall be for a period not to exceed three (3) years unless cause is based on a felony conviction for an offense related or associated with fraudulent contracting or misappropriation of funds wherein the suspension shall not exceed seven (7) years.

APPENDIX A IT STANDARDS AND TECHNICAL REQUIREMENTS

TECHNICAL REQUIREMENTS

1.1.1 HARDWARE AND SOFTWARE REQUIREMENTS

This section presents the requirements for the County's hardware and software standards. Actual memory sizes, processor speeds, peripherals and system software standards packages shall be recommended by the Proposer.

(Please provide complete hardware specifications within your response. Refer to below "County Standards" for acceptable configuration information.)

Fulton County desires to be provided with both the cost to purchase all hardware and connectivity for this solution as well as an optional complete, end-to-end, turnkey solution including all hardware necessary for the solution. Vendor must include a complete itemized hardware recommendation. Vendor's recommended hardware specifications must conform to the County hardware standards specified in this section. The goal is to have a high-performance system rather than an economical one.

Servers, desktops, laptops and tablet PCs shall not require administrator rights to operate. The County standard prohibits providing administrator or root privileges to servers for executing any software in the production environment.

Servers are procured by DoIT, through the Fulton County Purchasing Department as warranted by many factors, including current utilization of existing infrastructure, the requirements of planned projects, and the availability of specific funding for new equipment. Some platforms will share components and others will not, depending upon the unique circumstances for each project and product. Sharing and re-use are promoted when feasible. Agencies work with DoIT to develop a technical task plan and budget estimate for the project's hardware, software, middleware, peripherals, storage, maintenance, and connectivity. DoIT will assess the requirements in light of the current environment (and other factors) to confirm which components must be purchased by appropriate agency, and which will be paid for through DoIT funding. Servers are procured from currently listed standard models and configurations whenever possible.

 - The Interfaces properly provide the data necessary without disrupting the performance of the system or disrupting any of the original data files.
- Once this acceptance testing is complete and Fulton County verifies the acceptable installation, the warranty period will begin.
- The system will be considered “unavailable” if any of the following conditions occur:
 - Any component or module capability is not available to all active workstations.
 - Any feature or specification either required within this document or stated in the manufacturer’s response or literature does not perform as stated.
 - Conversion of all existing data files is not complete or is incompatible
 - Interface to existing systems has not been completed
 - Reporting features are not available
 - Training for support and user personnel is incomplete or has not been accepted by the technical designee specified the “Professional Services” section.

In addition, if the system is reloaded in entirety, either manually or automatically, the system will be assumed to be down for one full hour or actual time if greater, per occurrence. Scheduled system reloads will be counted as actual time down only.

In the event that the required level of reliability is not demonstrated at the end of the sixty day period, the County may, completely at its own discretion, allow a period, not to exceed sixty (60) days, during which the Proposer is allowed to correct any deficiencies with the system. If this extension is allowed, the Proposer shall reinitiate certification by submitting a revised letter of certification to the County within the sixty (60) day extension period specifying the corrections made to the system. The certification process described here will then be repeated. This statement of the possibility of extension in no way obligates the County to do so.

Final acceptance will be made after the warranty period begins. This period will be a sixty-day (60) period of on-site post implementation support provided by the proposer to resolve any issues that arise after the system has been placed into production.

1.3 TRAINING REQUIREMENTS

The Vendor shall provide a detailed training plan outlining the documentation to be provided, training goal, learning objectives, and learning methods. The training plan shall also include any prerequisites required for training for both the user and technical support. If learning objectives are not met at the end of the training period, the Vendor shall provide alternates means to meet learning objectives.

1.3.1 USER TRAINING

The types and amounts of user training that will be supplied at no additional cost shall be described. The proposer shall include a plan that results in acceptable training for system operation. Vendor shall recommend best practices and system configuration for effective system set up. Using this information, the vendor will prepare a manual (DVD/CD only) that defines all work flow processes and procedures for users. The vendor shall provide a sample of the typical manual or training approach as part of the response.

1.3.2 DoIT TRAINING

The proposer shall prepare a training plan for County staff that will enable them to operate and support the system. This plan shall include any courses to be provided off-site, classroom training, and on-the-job training necessary for systems analysts, computer operators, security personnel, programmers, and database, web and network personnel. Training to provide complete support and custom programming and custom reporting will be provided to IT staff. Describe any prerequisite knowledge or skills required. If there are additional costs for this training it shall be clearly identified in the proposal.

Additionally, a description of the number and type of staff required to support the system must be provided. The skill sets required of each individual should be included in this description. The description of staffing requirements should include all management, technical and functional areas for the ongoing support of the system. Training should be provided for a minimum of two employees in all support roles. "Train the trainer" methods of instruction will not be accepted.

During this training, Fulton County will designate senior technical personnel in each class to evaluate the training provided in order to ensure that the training and the instruction provided is sufficient to provide the necessary knowledge and skills. At the end of the first day of any training class, a signoff must be obtained from this designee in order for the proposer to meet this requirement.

1.4 APPLICATION DOCUMENTATION

It is required that the vendor provide an electronic copy, and optionally a paper copy of the following documentation. Please list all reproducible (DVD or CD format only) copies of documentation that will be provided prior to final system acceptance. For example:

System Development Life Cycle & Project Management Methodology

2.0 MANAGEMENT REQUIREMENTS

2.1 PROFESSIONAL SERVICES

The Vendor shall provide both services that follow the guidelines for SDLC (Systems Development Life Cycle) to successfully implement this project. The phases that should be incorporated in this project by the Vendor are to include: 1) project planning, 2) requirements definition, 3) design, 4) development, 5) integration and test, 6) implementation, 7) operation and maintenance.

2.1.1 PROJECT PLANNING PHASE

During the planning stage, the Vendor shall verify that the goals and objectives of the software align with those of the customer (the County). The output of this phase should include documentation:

- Project plan and schedule
- Comprehensive listing of scheduled activities for the Requirements phase

2.1.2 REQUIREMENTS DEFINITION PHASE

This is the core of the project and therefore should be approached with thoroughness. The Vendor shall perform due diligence to ensure the requirements are defined in further detail to ensure the software application will meet the needs of the user. The requirements shall define the major functions of the proposed solution, operational data areas and reference data areas, as well as defined the initial data entities. The major functions include, but not limited to, critical processes and mission-critical inputs, outputs, and reports. Mission-critical may be defined as any aspect that has an effect on the operations of the direct and indirect departments that shall be impacted by the proposed solution. Additionally, a gap analysis shall be performed to identify any gaps in the current requirements and the functionality which the software application can provide. For those requirements that cannot be fully met the baseline software application, it shall be identified feasible work-around. The work-around must be of minimal impact to users and must be agreed upon by the users prior to final approval. The output of this phase should include the following documentation:

- Detailed requirements document
- Requirements traceability matrix which outlines how each requirement is linked to a specific product goal in a hierarchical listing
- Updated project plan and schedule

2.1.3 DESIGN PHASE

The design phase will consist converting the approved requirements document into design elements. For a pre-packaged software application, design elements will consist of features and functionalities readily available in the baseline product. The design phase shall include detailed and comprehensive data modeling. The data model shall abide by standards set forth by ANSI, American National Standards Institute. The data modeling shall take into consideration the: detailed data requirements, technical environment, performance consideration, business processes (rules) and business data. The output of this phase should include the following documentation:

- Entity relationship diagram(s) with a full dictionary – this diagram should not be solely based on the data as defined in the baseline product; however, it shall include any data that is specific to the County
- Semantic or conceptual data model
- Table of business rules – this table should not be solely based on the data as defined in the baseline product; however, it shall include any data that is specific to the County
- Business process diagrams

2.1.4 DEVELOPMENT PHASE

The effort required for development of the solution in this phase may be minimal due to the ideal solution being that of a pre-package nature. However, this phase must be included to ensure the requirements and design requirements are being fulfilled. The Vendor shall configure and provide configuration instructions that shall be made to the software application to ensure the user's requirements are fulfilled. Any modifications that may be required to meet the user's requirements shall be clearly identified as a configurable option or customization to the code. It highly recommended the minimum or no customization be performed at the code level. However, if the aforementioned scenario can not be avoided, the vendor must include the impact of the customization in terms of initial cost, ongoing maintenance and support, and upgrades. The Vendor shall provide test cases for the modules, system, and users. The output of this phase should include the following documentation:

- Fully functional software that satisfies requirements and design elements
- Test plans – shall describe the test cases that will be utilized to validate the correctness and completeness of the software
- Implementation plan

2.1.5 INTEGRATION AND TEST PHASE

In this phase, the software shall be moved from the development environment to a test environment. The reference data should be

finalized, appropriate level of access and roles are provided for users. The test plan shall include: unit testing, system testing, integration testing, regression testing, and user acceptance testing. The output of this phase should include the following documentation:

- Integrated software
- Production implementation plan
- Acceptance plan which include test cases

2.1.6 IMPLEMENTATION

This phase shall be comprised of the acceptance, installation, deployment of the application so to ready the software application for a production environment. The proposer shall include the setup for a training/test environment on the test server which is completely separate from the live production server environment. This entails the completion of user acceptance testing as well as software specific testing. The user acceptance testing will include the successful testing of the user requirements as outlined in this document as well as those identified in the requirements gathering phase of the project. The software testing will include performance testing for each unit as well as the integration into various software modules. The software testing may also include the testing of integration with external applications. Successful execution of the test application is a prerequisite to acceptance of the software application by the customer. The output of this phase should include the following documentation:

- Test cases including results and person(s) who performed test
- Sign-off for acceptance of test cases

2.1.7 OPERATION AND MAINTENANCE

The operation and maintenance of the application will consist of a partnership of the Vendor and DoIT. Therefore, the vendor shall provide documentation that describes the requirements for the software application to function in a production environment. This Vendor shall provide all requirements needed for the application to be maintained in an operational environment.

2.1.8 MODIFICATIONS AND ADDITIONAL SERVICES

Any supplemental programming modifications or other consulting services beyond the scope of the contract that are requested by Fulton County shall be provided by the Contractor on a time and materials basis. Said billing rates shall remain at those rates until one year from the execution of the Contract at which time the Contractor will provide time and materials assistance at the rate charged to other Contractor customers for similar services.

Prior to commencement of services, the Contractor shall define in writing the labor hours, billing rate, description of services and/or work to be performed, the changes or additions to the Application Software, the way

in which the Application Software will function upon completion of the modifications, and the estimated time period for the services to be performed. Fulton County shall not be charged for any services until the additional services are approved by Fulton County personnel in writing. Only after the Contractor receives approval in writing from Fulton County will the Contractor perform the additional services.

2.2 PROJECT MANAGEMENT

Fulton County uses the Project Management Institute's (PMI) Project Management Body of Knowledge Guide (PMBOK) methodology as a project management best practice. The proposer should describe their experience in implementing and managing projects using PMBOK or a similar project management methodology.

The county is particularly interested in how the Proposer's project management approach utilizes the following or similar key process groups when implementing a project. Also, the Proposer should provide documentation which shows their understanding of the application of such documents within each key process group.

2.2.1 INITIATING

This stage includes preparing the up the project for success by identifying the right team (especially the project manager) and scope, as well as determining the relationship between the project and its alignment with the client's overall objectives.

2.2.2 PLANNING

This stage includes developing the relevant resources, timelines and milestones, and aligning project deliverables to business priorities (i.e. risk management, communications, quality, cost/budgeting, duration and sequencing, external dependencies). The output of this phase should include the following documentation:

- Project plan
- WBS including deliverables with estimated start and end dates for each activity and the required resource. These dates shall be monitored and adhered to; the inability to meet scheduled dates of a task within the critical path must be submitted to the PMO and approved prior to making change in the schedule. If the project is not complete as scheduled, a penalty will be enforced. This penalty will include a deduction of .1% of professional services for every business day the project is delayed.

2.2.3 EXECUTING

This phase includes assigning a project team and distributing information to ensure the proper project activities are undertaken. This process also includes ensuring quality assurance methods are in place to address change management. The output of this phase should include the following documentation:

- Regularly scheduled status meetings as outlined in the communication section of the project plan.
- Issue tracking log – all issues pertaining to the project shall be monitored and tracked throughout the project lifecycle. Upon closure of an issue, the issue shall not be deleted but rather moved to an archive issue log.

2.2.4 CONTROLLING AND MONITORING

This phase includes ensuring the resulting project activities is in check with the original project charter and plan, and risk from uncontrolled external actions is mitigated.

- Monitor quality, costs and schedule;
- Manage stakeholder relationships, risk and contract monitoring;
- Identify discrepancies (or variations) within the project schedule to ensure project schedule is met.
- Ensure proper project communications

2.2.5 CLOSING

This phase entails making sure you have delivered everything expected of the project based upon the agreed upon terms in the requirements gathering phase as well as the acceptance criteria.

Fulton County will provide an internal Project Manager to coordinate with the Project Manager of the vendor. This project manager will be responsible for providing all necessary Fulton County resources and for providing an independent status report to the County on the progress of the project as well as obtaining the necessary approvals for each milestone.

The following services will be required of the Project Manager:

- Identify County's current Business Processes that exist today. Including a gap analysis to identify and document existing gaps between the selected software applications and current business processes. The vendor should anticipate that the County might modify processes to match the selected solutions pre-configured system rather than make custom software modifications.
- Provide the County with the development of a project plan, project schedule and a high-level project budget including software, services, training and maintenance necessary to successfully

implement a legislative information management and tracking system.

APPENDIX C

POLICY AND PROCEDURE

SUBJECT: **Information Technology Network Infrastructure Administration**

DATE: April 7, 2004

NUMBER: 600-61

Statement of Policy: It shall be the policy of Fulton County to ensure that its information technology network infrastructure is established, maintained and administered in a manner that provides effective, efficient and secure access to information resources acquired and maintained via electronic means. The administration of the County's network infrastructure, to include Internet, Intranet, e-mail, telecommunications and connectivity to all County computer systems, shall be governed by this policy.

Background: The Department of Information Technology is responsible for the administration of the County-wide information network infrastructure. This requirement is a result of the demand for ensuring the secure and uninterrupted operation of the County's varied communications networks. This includes telecommunications, Local Area Networks (LANs), Wide Area Network (WAN), e-mail, and other internal (County) and external (other governments, outside organizations, etc.) communications protocols between computer systems. The dispersal of computer systems and network resources, and exposure posed by modern communications systems, compounded by the rise and consequences of computer born viruses to County computer systems, contribute to the need for a centralized administration of the County's information network.

Definitions:

Backbone - the core network infrastructure (wiring, fiber optics, network switches and routers, etc.) that provides a high-speed connection between all of the various servers within the campus environment.

Cabling - wiring (generally copper or fiber optic) used to connect individual computer devices to the LAN or Backbone.

Domain - a group of computers and devices on a network that are administered as a unit with common rules and procedures. Within the Internet, domains are defined by the IP address. All devices sharing a common part of the IP address are said to be in the same domain.

File Server - one or more personal computers (PCs) or specialized computers that contain files and share them with all other authorized network users. The activity is controlled by software known as the Network Operating System (NOS). Depending upon the features of

the file server software, a network user may share files and data from one or more dedicated servers.

Internet Protocol (IP) - an addressing convention mechanism that enables equipment located on multiple networks to communicate with each other. IP performs something like the Internet's postal addressing system.

Policy and Procedure, continued

600-
61

Local Area Network (LAN) - a data communications network spanning a limited geographical area, often a few thousand feet within one building. It connects PCs, other forms of computers and specialty networking devices.

Mainframe - a large computer with packaged software and peripherals (printers, disk drives, tape systems, etc.).

Network Administrator - an agent or organization responsible for the development, management, operation, and supervision of a computer network. This includes equipment, cabling, data circuits, and addressing conventions.

Network Administration - activities and/or actions performed in managing a computer network. These activities and/or actions enable a Network Administrator to coordinate information and resources effectively and expeditiously. This includes the design, monitoring, and supervision of the communications infrastructure.

Network Management - a set of activities designed to keep the network running optimally. These activities fall into five categories: 1) configuration management; 2) fault location and repair management; 3) security management; 4) performance management; and 5) accounting management.

Router - a network device that determines where and how a unit of data should be forwarded toward its destination within a Local Area Network (LAN) or a wide Area Network (WAN).

SPAM- an e-mail (electronic message) in which: (1) the recipient's personal identity and context are irrelevant because the message is equally applicable to many other potential recipients; and (2) the recipient has not verifiably granted deliberate, explicit, and still-revocable permission for it to be sent; and (3) the transmission and reception of the message appears to the recipient to give a disproportionate benefit to the sender.

Switch - a network device that selects a path for sending a unit of data to its next destination.

Wide Area Network (WAN) - a data communications network that covers a wide geographical area. A WAN may include a variety of transmission technologies such as private lines, T1 circuits, packet switching networks, satellite hops, microwave links, dial up phone lines and the equipment to use them.
