Procurement Award • National Purchasing Institute

**Addendum No. 1**  
**Page Two**

ACKNOWLEDGEMENT OF ADDENDUM NO. 1

The undersigned proposer acknowledges receipt of this addendum by returning one (1) copy of this form with the proposal package to the Fulton County Purchasing Department, Public Safety Building, 130 Peachtree Street, Suite 168, Atlanta, Georgia 30303 by the ITB due date and time

This is to acknowledge receipt of Addendum No. 1 , \_\_\_\_\_ day of \_\_\_\_\_, 2011.

\_\_\_\_\_ Legal Name of Proposer

\_\_\_\_\_ Signature of Authorized Representative

\_\_\_\_\_ Title

**Submitted Questions/Inquiries and Answers**

**Q1:** On page 57, a requirement reads “*Overall Software Requirements: The application shall interface with LDAP (Lightweight Directory Access Protocol) to allow for single sign-on*”. Constructware cannot support LDAP. If this is a show-stopper we must know immediately because it will prevent Autodesk or its resellers from participating.

**A1:** Response - LDAP is not a mandatory requirement for this application, however the following should be features of Autodesk Constructware.

Security Features of Autodesk® Constructware:

**Access Information Instantly**

Internet-based Autodesk® Constructware® project management software can be accessed from anywhere via a web browser, 24 hours a day, 365 days a year. You have the freedom to conduct business from anywhere and not be tied to a LAN-based system.

**Centralized Database**

Project and company information is stored in a single, powerful database. This centralized data store minimizes the need for multiple logins to a project website. In addition, because data is stored in a central location, decision makers can quickly view information and run reports across the enterprise.

**Security for the Company and the User**

Autodesk Constructware maintains two levels of security for every user. First, you have the ability to control the projects each user can access. Second, you can control which modules each user can view. If access is given to a module, you can then grant up to eight levels of security within that module (view, delete, change, and so forth). Users also have controlled access to their accounts with a unique username and password. Combined, these security settings help to ensure that your confidential data remains confidential, regardless of the number of users.

**Q2:** Also on page 57, a requirement lists....

*Configuration: The vendor shall configure the following enterprise data:*

**a. Global Categories**

- i. Financial periods*
- ii. Global calendars*
- iii. Overhead codes*
- iv. Timesheet periods*
- v. Funding sources*

**Addendum No. 1**  
**Page four**

- b. Risks Categories*
  - i. Risk Thresholds*
  - ii. Risk Scoring Matrix*
  - iii. Risk Categories*
  - iv. Risk User-Defined Fields*
- c. Issues Categories*
  - i. Issue Codes*
  - ii. Issue User-Defined Fields*
  - iii. Documents category*
  - iv. Document Categories*
  - v. Document Statuses*
  - vi. Document User-Defined Fields*

**A2:** Global Categories (Comparable to the Cost Management Module categories)  
Risks Categories (Comparable to the Risk Management Module categories)  
Issues Categories (Comparable to the Document Management Module categories)

**Q3:** Have any other questions been submitted by other potential bidders/respondents?

**A3:** Responses to all questions will be provided in the addendum.
