SECTION 82-251 COMMERCIAL WASTEWATER PRETREATMENT

Fulton County has passed a new ordinance. It will affect all businesses in unincorporated Fulton County as well as those cities discharging to the county sanitary sewer system and wastewater treatment plants. Commercial businesses with an oil separator, grease trap or sand trap must be permitted under the new regulations. The ordinance defines these businesses as commercial waste generators (CWG). Each CWG will be required to fill out a commercial waste discharge permit application and will be charged an annual fee based on the number and type of pretreatment systems they have on site. The permit process will be from January 1—March 31st of any given year, starting in 2007. All existing CWG as well as new facilities will be issued a commercial waste permit application. New CWG projects approved for discharge to sanitary sewer after March 31st, must obtain their commercial waste permit during the review process. The fee will not be prorated.

[SECTION 82-251; ARTICLE 10 COMMERCIAL WASTEWATER PRETREATMENT](#)

All commercial waste permits shall be issued annually from January 1 – March 31. Any existing facility obtaining a permit after March 31st will be charged a 25% penalty fee. A new facility opening after the annual permit period will not pay a penalty unless it has been determined that the facility has been opened for more than (30) days. The 25% penalty fee shall apply. A new facility applying for a commercial waste permit after the permitting period will not pay a prorated fee. The following fee schedule details the cost of an annual permit based on type of pretreatment system.

<u>Pretreatment Size</u>	<u>Type</u>	<u>Cost \$</u>
1-5 Tanks	Subsurface System (exterior)	250.00
6-10 Tanks	Subsurface System (exterior)	500.00
11-15 Tanks	Subsurface System (exterior)	750.00
10-100 pounds (1-2 units)	Manual (Interior)	75.00
20-35 GPM (1-2 units)	Automatic Grease Recovery	75.00
Combination of Systems	Subsurface, Manual & Automatic Grease Recovery	150.00 to 900.00

COMMERCIAL WASTE GENERATOR PERMIT FEE SCHEDULE
