Compared to the State of Georgia, which has **55%** of its population fully vaccinated, Fulton County is doing better than the state.

Fig. 1. Both Georgia and Fulton County are below the White House goal of having 70% of adults with at least one dose.
VACCINATIONS BY DEMOGRAPHIC CHARACTERISTICS

Fig. 2. Number of Residents Fully Vaccinated + Boosted By Age

For information on vaccine eligibility and availability, or to schedule your Covid-19 vaccine, click here. Percentages refer to the percentage of age group population fully vaccinated and boosted. Percentage vaccinated might appear to exceed the estimated number of individuals in a given age group or category. This could be due to increases in current resident numbers versus census estimates, which are based on 2019 census data.

Fig. 3. Age Distribution Among All Fulton Residents Fully Vaccinated + Boosted
N = 290,554

25-64 year olds account for 63% of all residents fully vaccinated + boosted.
Percentages refer to the percentage of the racial sub-population that are fully vaccinated and boosted.

Fig. 5. Race Distribution Among All Fulton Residents Fully Vaccinated + Boosted
N = 290,554
**Fig. 6. Number of Residents Fully Vaccinated + Boosted by Ethnicity**

- Population in Fulton
- Number Vaccinated

- Hispanic: 18%
- Non-Hispanic: 28%

**Fig. 7. Number of Residents Fully Vaccinated + Boosted by Sex**

- Population in Fulton
- Number Boosted

- Female: 29%
- Male: 27%
- Unknown
**How to interpret these colors:** The brighter the blue, the better. The upper most blue box indicates low COVID-19 case rates and high vaccination coverage. Red is not ideal as red indicates high COVID-19 case rates and low vaccination coverage. Colors in between indicate varying combinations of COVID-19 case rates and vaccination coverage. COVID-19 case rate reflects new COVID-19 cases diagnosed between January 31 and February 27, 2022 across Fulton County.
