

Fulton County Board of Health Epidemiology Report

COVID-19 Diagnoses – 7/13/2020

SUMMARY

- As of July 13, 2020, Fulton County has recorded 10,736 cases of the 2019 novel coronavirus (COVID-19) and 323 deaths.
- Of 3,953 **new diagnoses** made between June 23 and July 06, the central portion of the county (Atlanta metro) accounted for 50% while the northern and southern parts accounted for 21% and 18% respectively.
- By city, **new** COVID-19 diagnoses rates range from 143.5 per 100,000 persons (Johns Creek) to 452.0 per 100,000 persons (Atlanta). [Fulton County Diagnoses Rates (per 100,000 persons): Cumulative 1,009.1; Incident 371.5]. See map showing incident case rate by ZIP code on Pg.4.
- Among all persons diagnosed with COVID-19 in Fulton County, 11.7% required hospitalization and 3.0% died.
- Residents and staff of long-term care facilities account for 12% of COVID-19 diagnoses and 56% of COVID-19 deaths
 in Fulton County

*Counts shown reflect the number of confirmed cases as of 9:00am on 7/13/20 using the date of first positive sample collection. Where date of sample collection was not available or missing, the date of report creation in GA SENDSS was used instead. **Note:** All data reported are preliminary and subject to change. Delays in data reporting may cause changes in data counts, particularly in the shaded portion.

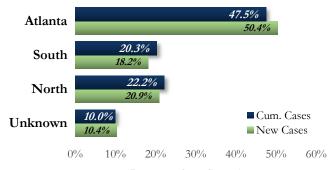

DISTRIBUTION OF COVID-19 DIAGNOSES BY REGION

New cases: 50% of the new COVID-19 cases diagnosed in the past 2 weeks occurred in Atlanta while 21% and 18% occurred in the Northern and Southern regions of the county respectively.

Fulton Region	% Cumulative	% New	
	count	cases*	
Atlanta	47.5%	50.4%	
North ¹	22.2%	20.9%	
South ²	20.3%	18.2%	
Unincorporated/Unknown	10.0%	10.4%	

¹Includes all Fulton County cities north of Atlanta metro (Alpharetta, Milton, Johns Creek, Roswell, Sandy Springs, Mountain Park) | ²Includes all cities south of Atlanta (College Park, Chattahoochee Hills, East Point, Hapeville, Palmetto, South Fulton, Fairburn, and Union City) *New cases: Cases diagnosed in the past 2 weeks only (between 6/20/20 – 7/03/20).

¹New cases: Cases diagnosed in most recent 28 days (based on reported dates of positive sample collection). To allow for lag in reporting results of new diagnoses from samples collected in the most recent week, data used for incident diagnoses analyses were moved back by one week. ²Cumulative diagnosis rate: Population estimates from US Census Bureau used to calculate cumulative diagnoses rate. All rates shown are per 100,000 persons. ³Percent change: These reflect the percentage increase or decrease in new diagnoses between the 14 days preceding the most recent 7 days and the 14 days preceding that. Changes in cities with less than 10 cases in both 2 week intervals are not reported ⁴Incidence Rate: Rate of new diagnoses in the recent past 14 days.**Data cleaning (either during case interviews or address geo-coding) may lead to reassignment of few cases from one territory to another based on their corrected addresses. These may appear as "decreases" when compared to the previous day's count. These do not reflect errors in the data collection or analysis process but only reflect the minor day-to-day fluctuations in case counts that arise in an evolving public health database like COVID's. Note: Sharp increases in territorial COVID case counts often reflect new cases diagnosed at long term care facilities located in those territories during facility-wide /mass screening events All data reported are preliminary and subject to change.

^{*}Rates shown are per 100,000 persons | **Note:** Mass testing in specific locations (e.g. long term care facilities) may cause sharp increases in the cumulative rate of COVID-19 diagnosis in those territories. All data shown are preliminary and are subject to change as testing results get updated.

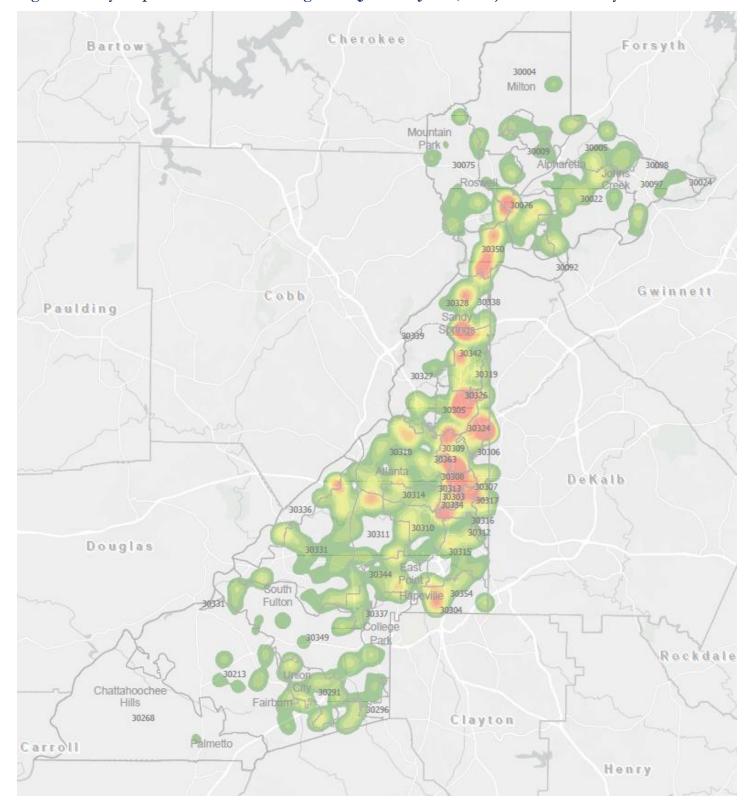

Fig. 4. Density Map - New COVID 19 Diagnoses (Jun 23 - Jul 06, 2020) in Fulton County

NB. <u>New COVID-19 cases:</u> Cases diagnosed in most recent 14 days (based on reported dates of positive sample collection). To allow for lag in reporting results of positive cases from samples collected in the immediate past7 days, data used for incident diagnoses analyses are moved back by one week. Map reflects new COVID-19 cases diagnosed between June 15th and Jun 28nd, 2020 across Fulton County.

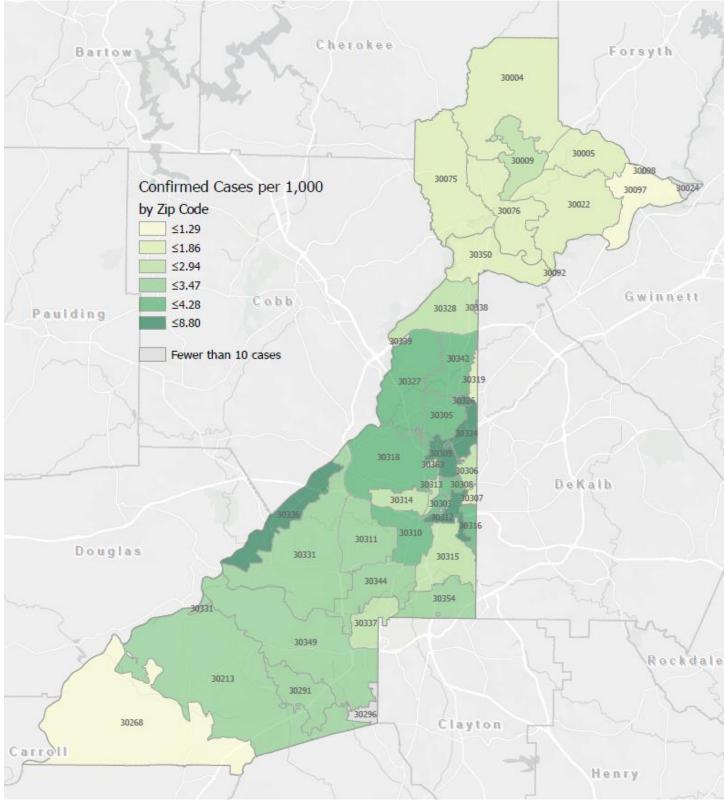

Fig. 5. New COVID-19 Diagnoses Rates by ZIP Code (Jun 23 – Jul 06, 2020)

*Rates shown are per 1,000 populations.

New COVID-19 cases: Cases diagnosed in most recent 14 days (based on reported dates of positive sample collection). To allow for lag in reporting results of positive cases from samples collected in the immediate past7 days, data used for incident diagnoses analyses are moved back by one week. Data used excludes outbreak-related cases at long-term care facilities and map shown reflects only the new non-LTCF cases diagnosed between Jun 15th and Jun 28nd 2020.

REPORTING SYMPTOMS AMONG PERSONS DIAGNOSED WITH COVID-19 IN FULTON

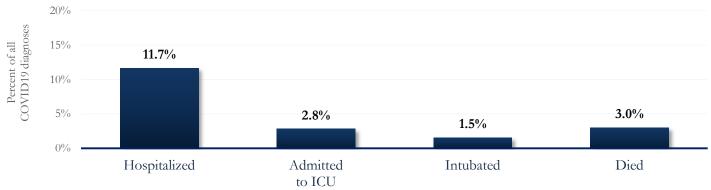

People with COVID-19 have reported a wide range of symptoms ranging from mild symptoms to severe illness. Symptoms may appear 2-14 days after exposure to the virus. Symptoms reported include: cough, shortness of breath/difficulty breathing, fever, chills, repeated shaking with chills, muscle pain, headache, sore throat, new loss of taste or smell – Centers for Disease Control and Prevention (CDC) https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html

COVID-19 cases who have been case interviewed or had medical charts reviewed as at 7/13/20 only

Note: All data reported are preliminary and subject to change.

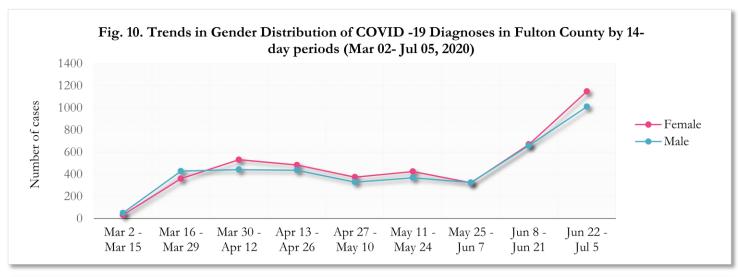

COVID-19 CASE TRENDS

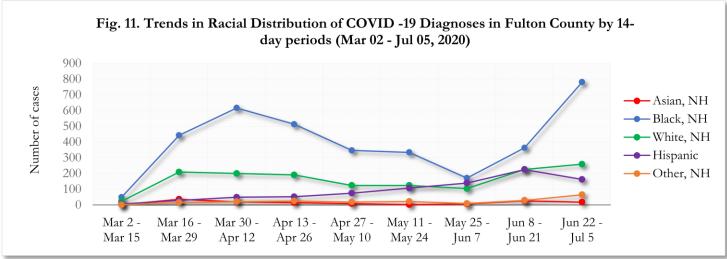

Atlanta metro has consistently accounted for the majority of newly diagnosed cases in Fulton County.

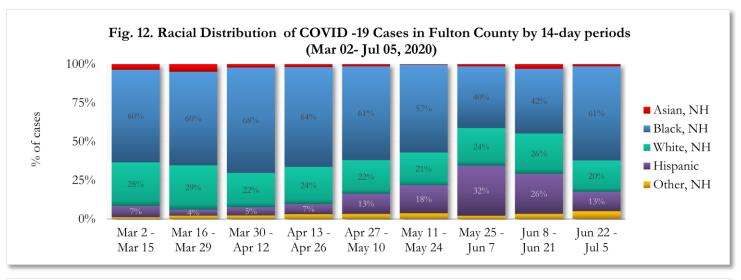

^{*}South - Includes all Fulton County cities south of Atlanta (College Park, Chattahoochee Hills, East Point, Hapeville, Palmetto, South Fulton, Fairburn, and Union City)

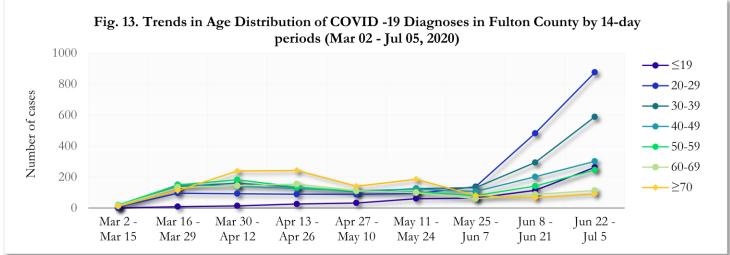

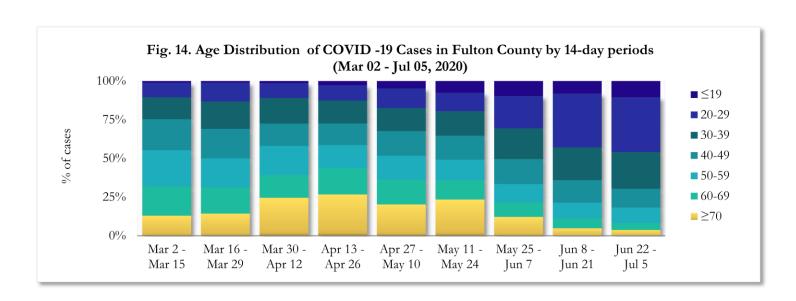

About 30% of COVID cases are missing data on patient race and ethnicity. Of cases with race and ethnicity reported, majority are Black non-Hispanic, followed by a smaller number of cases reporting White (non-Hispanic and Hispanic) race.

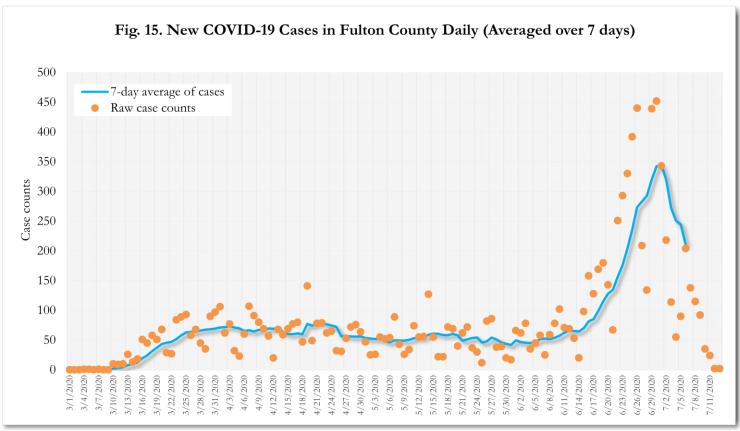

^{*}North -Includes all Fulton County cities north of Atlanta metro (Alpharetta, Milton, Johns Creek, Roswell, Sandy Springs, Mountain Park)

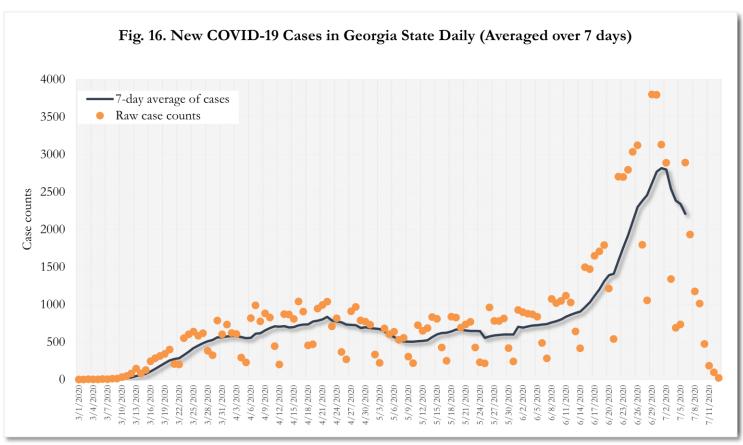

Earlier (March-May 2020) large proportions of reported cases were among persons aged 60 and older. However, starting in June, a much higher number of cases were among persons aged between 20-29 years.

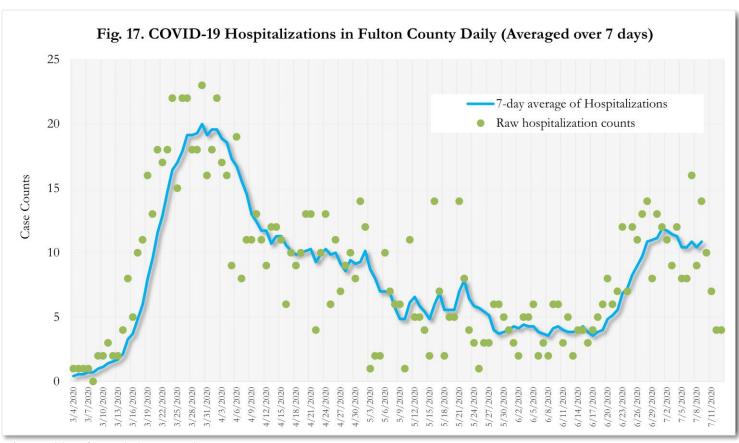

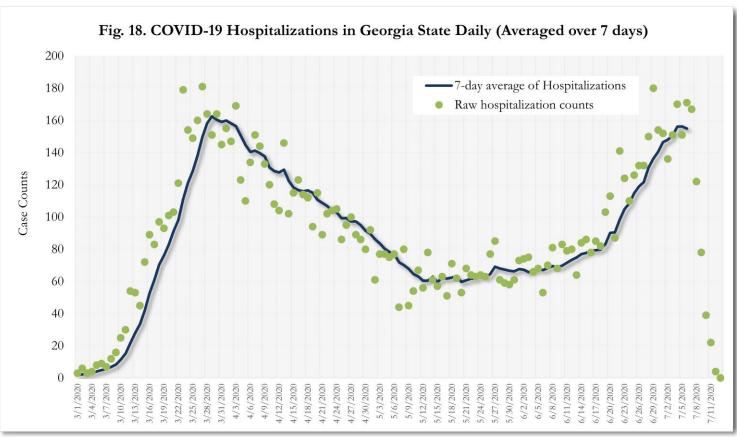

^{*}Date of collection of first positive sample used (report creation date used where sample collection date is missing).

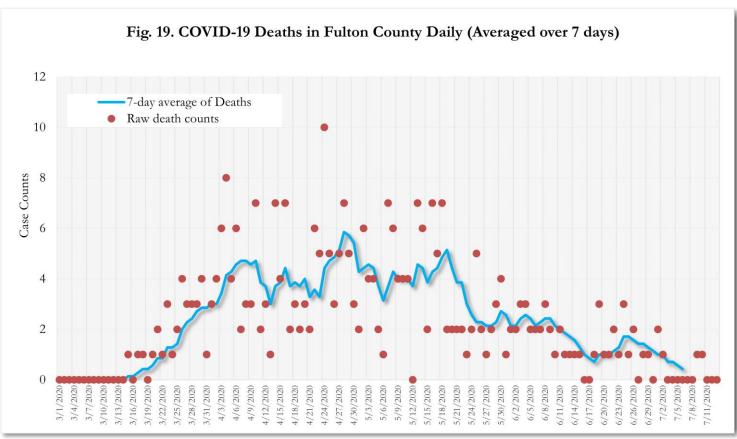

^{*}Date of collection of first positive sample used (report creation date used where sample collection date is missing).

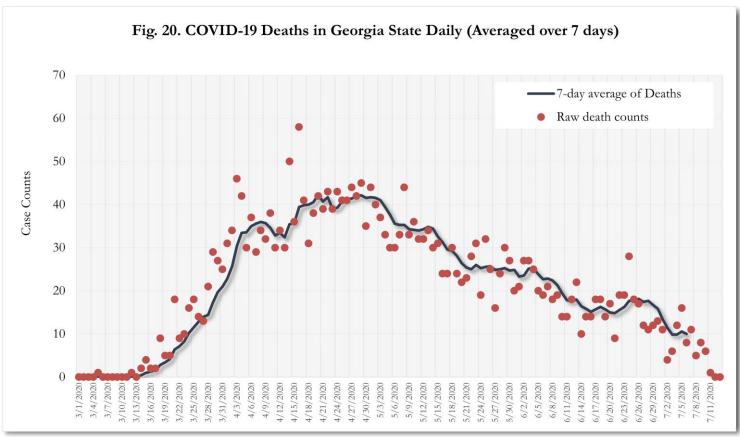

^{*}Reported date of hospital admission used.

^{*} Reported date of hospital admission used.

^{*}Reported date of death used.

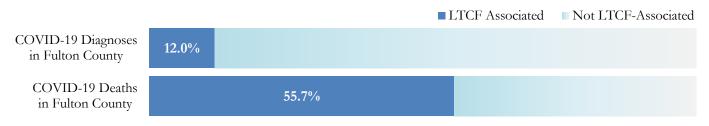

^{*} Reported date of death used.

COVID-19 IN LONG-TERM CARE FACILITIES IN FULTON

Older persons (aged 65 years and older) and persons who live in nursing homes or other long-term care facilities seem to be at higher risk for developing more serious complications from COVID-19. Extra precautions are recommended for individuals within this risk groups – Centers for Disease Control and Prevention (CDC 2020) https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-at-higher-risk.html
