

RATES

- Fulton County’s rate schedule features a **bi-monthly service charge** and a volume charge for each utility.
- Fulton County uses an inclining water block structure for domestic users effective in the summer months of April through October (specifically April 1st through October 31st).
- Residential Water Use is billed on a 3-tiered pricing system based on each domestic customer’s base (a.k.a. Winter Average) consumption during the winter months of November through March (specifically November 1st through March 31st).
- Outdoor water use meter readings are combined with indoor use in calculating the baseline winter water usage.
- For new residences, the base consumption is 16,200 gallons.

Monthly customer service fees cover the overhead costs for meter reading, meter maintenance and billing operations.

WATER CONSERVATION RATES (April 1 - October 31)		2020	2021	2022
