## Fulton County Elections Statement on the 2020 Election

The Fulton County Department of Registration & Elections is committed to conducting fair, accurate, and transparent elections that represent all Fulton County voters, regardless of the candidates they choose when casting their ballots.

The results of the Fulton County 2020 election were initially tabulated, subsequently hand-counted as part of the Georgia Secretary of State's risk-limiting audit and later recounted at the request of a candidate.

In addition, the results of the election were the subject of an independent monitor's report, multiple court proceedings and State Election Board investigations. The certified election outcome has remained unchanged, notwithstanding some administrative errors that were identified.

Importantly, no evidence of fraud has been substantiated.

Fulton County voters have consistently participated in presidential elections, with the results reflecting voter preferences.

| 2016 | | |
|------|------|------|
| Trump | 117,783 | 26.85% |
